---

## **Woodworking**

RM Auto Restorations houses a modern woodworking shop where body frames are artfully repaired or reconstructed. Our skilled craftsmen can recreate or repair carved interior trim moldings using original exotic woods sourced from around the globe.

## **Paint**

Our modern paint department will restore the allure of your classic with a fresh paint job in a period correct color or a unique custom shade. We use extremely durable and environmentally friendly paint systems and products, combined with thorough, meticulous preparation to achieve a mirror-like finish that will last for decades.

## **Instruments and Gages**

The expertise of our technicians extends to even the most delicate elements of a classic car - its instruments and gauges. We offer complete gauge rebuilding, including accurate face printing, electrical and electronic components rebuilding, and all original wiring harness installations.

## **Trim**

We can rejuvenate original stainless steel and aluminum trim and components with professional polishing, dent and scratch removal. We specialize in building and truing intricate wire wheels, and have access to the highest quality chrome plating available.

## **Detailing**

The finishing touch to make a classic look its best is a complete detail by a skilled professional who understands the unique needs of vintage motor cars. We offer cosmetic detailing of interiors, chassis, engine bays, and exteriors.

## **Transport**

Upon completion of restoration work, we can arrange secure transport for your treasured classic right to your door in our own fully enclosed transport truck. Alternately, we can coordinate shipping with your preferred transporter anywhere in the world, ensuring the safe delivery of your renewed, improved vintage motor car.

## **Upholstery**

Our upholsterers can recreate complete interior upholstery exactly as original including correct seat construction using period materials. We have excellent resources for sourcing hides and fabrics of all colours and patterns. We also specialize in convertible top reconstruction.
